## *EVENT INFORMATION*

VENUE: Centro Congressi Roma La Nuvola

DATE: November 24-26, 2023

VERNISSAGE: November 23, 2023

EVENT: International Contemporary Art Fair

ARTIST: Helidon Xhixha

ARTWORK: Getto di luce, 2023, steel, cm 1050 x 150 x 130

In conjunction with the III edition of the International Contemporary Art Fair - Arte In Nuvola - in Rome, sculptor Helidon Xhixha (Durazzo, 1970), in collaboration with Galleria Poleschi in Milan, has created a site-specific sculptural project that will stand at a height of over 10 meters in front of one of the most iconic buildings in the Capital, designed by architect Massimiliano Fuksas - La Nuvola.

The work "Getto di luce" (2023, steel, cm 1050 x 150 x 130) was conceived by the artist with an iconic triangular shape, a symbol of energy and dynamism, intent on tracing a defined, soaring direction upward. Despite all the events in which we are protagonists, it conveys a message of strength and positivity.

The difficulties, sufferings, and contortions of current society are highlighted in this work by the grooves along the central body. As in all of Xhixha's works, it is the pervasive light that "sculpts" the artwork, laying bare human fragility. Hence the need to find in steel a majestic structure, capable of reassuring and empowering human thought, creating a positive flow of energy essential for a future of bright prospects.

"Getto di luce" will be installed in the outdoor area at the entrance of the exhibition hall from November 23 to 26, 2023.
